- Sea Cave

Approximate Scale 1:50,000
1 inch = 0.8 mile
1 centimeter = 0.5 kilometer
0 1/2 1 Mile
0 1/2 1 Kilometer
Contour Interval = 25 feet

NATIONAL GEOGRAPHIC TRAILS ILLUSTRATED maps are based on USGS information, modified and revised by NATIONAL GEOGRAPHIC MAPS in cooperation with the National Park Service, USDA Forest Service, Wisconsin Deparmtment of Natural Resources, and Bayfield County Land Records Department. Additions or deletions are made to the USGS base to reflect current recreational information and to comply with the land management agency's resource protection policy. This map is revised regularly. However, changes do occur between map revisions. Check with the local agency for information before your visit. We welcome your input if you discover conditions other than as shown on the map. Send us a copy of the area in question noting your suggestion and it will be reviewed for the next revision.

NATIONAL GEOGRAPHIC maps are printed on a 100% plastic material which is waterproof and tear-resistant with normal use. If the map gets wet and the pages freeze together, thaw the frozen map before opening. Keep your plastic map away from petroleum products, such as solvents, stove fuel and sunscreens, which can potentially smear the map's ink.

No part of this map may be reproduced without the written permission of the publisher. NATIONAL GEOGRAPHIC MAPS and the NATIONAL GEOGRAPHIC SOCIETY are in no way responsible for personal injury, damage to property, or violation of the law in connection with the use of their maps.

Your support is a vital part of NATIONAL GEOGRAPHIC's ongoing mission to increase global understanding and promote conservation of our planet through exploration, research and education. For information about the NATIONAL GEOGRAPHIC SOCIETY and its programs and publications, or to become a member, please call 800-NGS-LINE (647-5463).

NATIONAL GEOGRAPHIC MAPS publishes more than 60 maps of areas within the national park system and more than 100 maps covering national forests and recreation areas across the United States. For additional information, or for a free catalog, contact:

GPS WAYPOINTS

Selected waypoints are located on this map. Latitude/longitude and UTM coordinates are located along the map border. In addition to the border coordinates, 5000 meter UTM grid ticks, Zone 15T, (shown in blue) are located throughout the map. When used with map datum NAD 27, these coordinates provide an approximate location fix.

GAYLORD NELSON WILDERNESS

This new addition to the National Wilderness Preservation System honors the late former Governor and U.S. Senator, Gaylord Nelson. The wilderness designation guarantees that the present management style of Apostle Islands National Lakeshore will be maintained in the future - emphasizing continued motorized boat access to the mostly-wild islands, but no motorized travel on the islands themselves.

The waters of Lake Superior within the National Lakeshore are not included in the wilderness area, nor are the lighthouses or other existing developed areas of the park. Sand, Basswood, and Long Islands were kept out of the wilderness boundary in their entirety, along with the park's 12-mile mainland strip.
